

### Fabulous field trip - Government Children's museum ,Egmore

The students of STDIV visited the **Government Museum Egmore**, a place of wonder as an educational trip on **19th October, 2019**. The children were awestruck to see the second oldest museum in India which is rich in a variety of artefacts. The antiquities consisted of sculptures, architectural pieces, metal and stone inscriptions which have a bearing on the past history and social life of the people of this part of India. They were glued to the details of the display in the archaeological and zoological section and shared their understanding with the peers. Our children's enthusiasm was welcomed by some of the History Buffs, adventure seekers and photo fanatics at the museum. The students spent their time reading, observing and taking notes on all the interesting facts witnessed during their visit.
