

CARRIER GUIDENCE PROGRAM

On January 3rd 2023, The resource leaders of Remo International College which is located in the Grand Southern Trunk Road visited our school to conduct a career oriented program for the students of class XII who are in the threshold of future.

Mr. V.Santhoshkumar, Assistant Professor, Department of Aviation and Swarna Ganesh Senior Counseller to disseminate us with various information about the 40 departments present in the Aviation Industry. They also answered all our queries and made us feel super confident as there are enormous opportunities waiting for us in the near future. Both the Science and Commerce stream students were so interested and asked various queries about the lifestyle, pay scale, working methods, leisure periods, extra benefits and many more about the Aviation employees.

Finally we were provided with flyers and the session got over. It was a power pack session as only a handful of students were aware about the Aviation Industry prior to the program which turned vice versa after the session.
