

Report on field trip.

The field trip for class 9th was scheduled on 27th jan 2023. The places were TI cycles and ICF rail museum, the student were asked to assemble in the school at 7am for the journey. We started from the journey at 8am and it took us 1 hr to reach TI cycles. Upon reaching there we had a seminar on murugappa group of companies and the safety measures we need to follow. We learnt a lot about murugappa group who owned everything including sugar, cycles, rubber ect.

Then after having wonderful refreshment we headed off to the factory when we were given with wonderful explanation on cycles and it's process of manufacturing it. we saw the painting process and assemblage of those. After the trip to the factory we all had lunch.

After lunch,the students began their journey from TI cycles to the ICF rail museum which took around 1hr hour.

Set amidst a well landscaped terrain, the museum showcases the rich heritage of the Indian Railways. The exhibits unfold the great and illustrious journey of the Indian Railways – from the antique steam engines to the more recently used diesel and electric locomotives. A fascinating collection of wagons, carriages and rail cars along with a lot of artifacts related to the railways such as different types of signaling equipment, telecommunication systems, antique railway furniture etc., fascinated the students.

Then the students were taken on a ride in the toy train which gave them tremendous joy and happiness. Later they were let to play in the outdoor parks where the students enjoyed playing enthusiastically. At last they were provided with some snacks before leaving the museum. After another 2 hour journey, the students reached the school

The trip was highly informative and joyful. The children learnt a lot and also enjoyed the trip.
