

FIELD TRIP (ISRO-SHAR) – XII A, XII B & XII C

Our Educational Field Trip to Sriharikota started at 5.50 am from school.

The trip to Sriharikota had 80 students, 6 teachers and 2 office staff and 4 parent volunteers

After a four-hour bus journey, we reached our destination at 10.30am.

Sriharikota houses the "Satish Dhawan Space Centre", which is one of the two Satellite launch pads in India.

After security check, students visited the Satellite Launching Pads, the Assembling and Mission control Centres.

Students were highly enthusiastic and asked questions pertinent to space developments.

Shwetha from 12A section met ISRO scientist Mrs.Porselvi. She caught the scientist's attention with her probing questions.

We took many new learnings on the advancements in space technology, much to the delight of the students. In sum, it was a fun- filled experience; one that was highly informative and truly delivered a very memorable trip for the students.
