

STEM PROGRAM

In a bid to motivate young students and kindle their passion for creative and innovative thinking for scientific and technological advancements, IIT Madras conducted an outreach program for rural school students through a summer program on Science, Technology, Engineering, and Mathematics (STEM) from 20th to 25th June. High school teachers and students have attended the STEM program. The Minister for School Education, Government of Tamil Nadu, Thiru. Anbil Mahesh Poyyamozhi inaugurated the IIT Madras Outreach Program for students in rural areas through the Summer Program STEM. The Director of IIT Madras Prof. V. Kamakoti and professors of the Department of Electrical Engineering, Prof. R. Sarathi, and Prof. Anbarasu Manivannan were also present at the inauguration. The main objective of the program was to motivate the students and bring in them a passion for creative and innovative thinking for advancements in science and technology. Speaking on the occasion, Prof. V. Kamakoti, Director of IIT Madras, said, "We have selected key topics such as electronics, which are important for the nation, to be taught during this five-day event." It was innovative and interesting as the students were able to learn many new concepts.
