

Beach cleaning Programme

Nearly 25 students of class 8th were taken to Besant Nagar beach, near Astalakshmi Temple for cleaning beach.

They all assemble with the teacher coordinator Ms. Gitanjali Elangovan there around 7am and some volunteers from EFI under whose guidance the students took up the cleaning work, initially they were given with a short introduction and an orientation.

The cleaning work started around 7:15 am and went till 8:30 am. Students collected 30 sack bags of plastic and non-biodegradable waste.

They cleared a stretch of 300mts, which was a tedious work, but children also learned the moral that they should not throw plastic waste near beach and other open areas. The students were also having placards with quotes on ill effects of plastics.

We thank the parents who participated enthusiastically in cleaning project.

We thank our management for allowing us to take up such social responsibilities.
