

Excursion to Chennai Rail Museum

The students of class III were taken to an excursion to the Chennai Rail Museum (ICF) on 9.2.2024.

The bus journey was thoroughly enjoyed by the children. The children were first taken for a joy ride in the toy train. The train ride with their friends was a memorable experience for the students. After the train ride, children were taken around the museum to see the Engines which were in service during the initial years of railways. The children were amazed to see the year of make and the engines which dated pre-independence. The students were then taken to the museum building which had important photographs and models of the engine. The museum also displayed various items like the horn, speedometer and signaling device which were initially used in the train journey. The model train pantry and compartments gave the students the real feel of a train journey. The students also witnessed the working model of an electrical engine which was amazing. After having lunch, the children spent time at the play area which rejuvenated their energy. The class students took a memorable photo at the venue and boarded the bus to return school.

First place visited was the Sea shell museum. It also had the pearl museum and an aquarium. The resource person in the museum was well prepared to receive our students and gave detail and interesting information on the shells and pearls. It was an interactive session. The students thoroughly enjoyed the museum. The excursion provided a wonderful opportunity to the students to bond, learn, explore and share.
