

PRIMARY INTER-HOUSE ACTIVITIES - July 2025(ACTIVITY-2)

On July 19th, 2025, students from Grades 2 and 3 enthusiastically participated in an engaging Inter-House Competition.

Grade 2 students showcased their creativity in the "**Scarecrow Challenge**", where they crafted scarecrows using only non-plastic materials. With great enthusiasm, participants transformed everyday items into imaginative and spooky scarecrows, highlighting their skills in art, craft, and design. The event encouraged hands-on involvement and allowed students to express their creativity in a fun and eco-friendly manner.

At the same time, Grade 3 students took part in the "**Tower Power Contest - Little Engineers**", representing their houses with pride. Using toothpicks and soft clay, they built the tallest and strongest towers they could imagine. The activity brought out their problem-solving abilities, creativity, and remarkable teamwork. Their collaborative spirit and determination were evident as they worked together right till the final moment to strengthen and elevate their towers.

The winners are as follows.
