

KYC (Know Your Child)

KYC, or Know Your Child, is a crucial aspect of early childhood education. This process is fundamental in understanding each child's unique interests, strengths, weaknesses, and learning style, which is essential for creating a nurtured and effective learning environment. By gaining insights into these aspects, educators can tailor their teaching methods to better support each child's development and learning journey.

The Nursery's KYC event was conducted on the 3rd and 5th of June. During this period, each child was carefully observed to understand how they respond to and interact with various stimuli. These observations are critical as they provide teachers with valuable information about each child's behavior, preferences, and areas that may require additional support or encouragement.

Parents played a significant role in the KYC process. Many brought their children to the event and eagerly involved themselves in the discussions and observations with the teachers. This active participation from parents not only enhances the accuracy of the KYC process but also strengthens the partnership between parents and educators, which is vital for the child's overall development.

The first KYC event for the Nursery went exceptionally well. The collaborative efforts of parents and teachers, along with the careful observation of each child, laid a strong foundation for the upcoming academic year. This successful event has set a positive tone for the rest of the year, ensuring that every child receives the personalized attention and support they need to thrive in their early education journey.
